MENTAL HEALTH SYMPOSIUM

Erasing the Stigma of Mental Health in the Church

Mental health is the hot topic in our nation and world today, yet rarely addressed in our churches and communities. Studies reveal that as African Americans we are less likely to receive treatment and the help we need. This symposium will address the stigma and how we can support and encourage people with mental illness.

Join in the conversation with state mental health professionals, clergy, and community leaders as we increase our knowledge and awareness on this hot topic.

SEATING IS LIMITED.
